Jan 2022- Feb 2023

Netaxis IT Solutions Private Ltd- Chennai, India

Junior Web Developer

- Designed and developed efficient and maintainable web applications.
- Identifying and fixing issues and bugs for web applications in development.
- Managed development milestones from initial steps through final delivery.
- Made through the analysis of chrome extension plugins in development and provided valuable inputs.
- Resolve technical issues through debugging, research, and investigations.

Projects

- **Demos.page** - The Demos.page Extension is an online video documentation tool that allows the user to record and document the steps during a task or process as a video.
- **Name.page** - Name.page is a tool with which you can add your professional email signatures to your email services. It provides the users with the hassle-free experience of attaching their email signatures to all the emails that they send out.
- **AutoTextify** - The AutoTextify extension is a text-expanding tool that eliminates repetitive typing of texts. This tool helps replace short abbreviations with longer phrases or sentences.
- **Sitespedia** - The Sitespedia Extension is used to create bookmarks, screen capture, highlight text, add sticky notes, and comment on the webpage. It's a productivity extension for visually organizing and managing all your web links, websites, favorites, inspirations and ideas.
- **QRkitify** - The objective of this project is to create QR scanners based on URL and text. It allows the user to customize the QR code and download the created QR codes in different file formats.
- **Logokitify(favlconGenerator)** - Favicon Generator is a tool to create and download favicons. It is used to generate the favicons per platform and make them look great everywhere.
