### SUMMARY

Passionate UI Developer with a year of experience, dedicated to crafting visually stunning and user-centric interfaces. Seeking an opportunity to contribute my skills in HTML, CSS, Bootstrap and JavaScript to create seamless digital experiences. Eager to collaborate with dynamic teams and leverage creativity to enhance user satisfaction in a challenging and growth-oriented environment.

### EXPERIENCE

#### Junior UI Developer ( Feb 2023 to Present )

SKAD IT Solutions, Bangalore India.

##### Project: Task Force

- Utilized the Angular framework to develop interactive and dynamic user interfaces for the task management application, including components, services, and modules.
- Collaborated with UX/UI designers to translate wireframes and design mockups into responsive and visually appealing Interfaces, Incorporating Angular Material components or custom styling.
- Configured routing and navigation within the Angular application to enable users to navigate between different views, pages, and features of the task management software seamlessly.

##### Project: Edifice CMS

- Developed UI design to package modules components.
- Developed UI elements are responsive and adapt well to various screen sizes and devices.
- Worked closely with back-end developers (PHP) to integrate front-end components into the application.
- Provided outputs as client request and requirements.
- Optimised frontend code and assets to improve page load times and overall performance of the application.

##### Project: PTTG

- Designed and developed responsive layouts and UI components that adapt gracefully to various viewport sizes and devices.
- Optimised the performance of websites by minimizing load times, optimized asset delivery (e.g., Images, Videos).

##### Project: Ivory Hub
