SUMMARY

Aspiring Full Stack Developer with over 2 years of experience in Java development within the shipping domain, seeking to leverage comprehensive knowledge of software engineering principles and a strong foundation in Java and full stack technologies to drive innovation and efficiency in software solutions.

SKILLS

- Leadership
- Quick Learner
- Team Coordination
- Positive Attitude
- Quick Learning
- Effective Listening
- Decision Making

EXPERIENCE

Software Engineer (Java Developer)

Shipping Domain/ Jul 2022 to Current

- Developed and maintained Java-based applications, contributing to a major project currently in production
- Accumulated 2 years of experience specializing in the shipping domain, enhancing software solutions for operational efficiency.

Java Developer

Tariff Management

- Developed and implemented tariff management solutions, including coding tariff rates for containers
- Led the creation of a comprehensive screen for FMC in tariff management, streamlining rate fixing processes for containers.

Full Stack Developer

Pricing Guideline

- Contributed to the development of a pricing guideline application, facilitating the rate, time, and schedule management for container shipping
- Integrated Kafka to enhance data flow across customer interfaces.

EDUCATION AND TRAINING

B.Tech in Computer Science

Madha Engineering College, Anna University Jan 2021

GPA: 8.00

Secondary School

St. Johns Matriculation Secondary School Jan 2017

Percentage: 80%

Higher Secondary

St. Johns Matriculation Higher Secondary School Jan 2015

Percentage: 90%

ACCOMPLISHMENTS

Developed two applications for tariff management, both of which are currently live and operational, receiving positive feedback from clients.

AREAS OF INTEREST

- Java
- MySQL
- Oracle
- Advanced Java
- JFS
- HTML
- CSS

PERSONAL INFORMATION

- Date of Birth: 08/19/99
- Gender: Female
- Nationality: Indian
- Marital Status: Single

LANGUAGES

- Tamil
- English
- Hindi

HOBBIES AND INTERESTS

- Reading Books
- Watching Series
- Writing Diaries
- Playing Basketball

PROJECTS

Tariff Management, Java Developer, 30, 1 Year, Developed and implemented tariff management solutions, including coding tariff rates for containers. Led the creation of a comprehensive screen for FMC in tariff management, streamlining rate fixing processes for containers. Pricing Guideline, Full Stack Developer, 35, 8 Months, Contributed to the development of a pricing guideline application, facilitating the rate, time, and schedule management for container shipping. Integrated Kafka to enhance data flow across customer interfaces.
