## PROJECTS

### Spam Detection Technique In Twitter Using Machine Learning with PCA analysis , 120 Days

Since Twitter is popular among so many people, it makes it easy for spammers to thrive. Spammers are people who send unwanted messages to people to either advertise a product or lure the victims into clicking malicious links, which may affect their user systems. However, these systems cannot filter each spam message and a different account can be created by a spammer and used to send other messages.
