PROJECT

Mini project:

Title : Realme Online Store

Role : Team Member

Technology : Angular (Front-end), Express Js & Node Js (Back-end) and MongoDB (Database)

Description: Now-a-days all are interested to buy online. So, we thought to design an E-Commerce website. our website fully loaded with latest electronic appliances. Customers who approach our website will not get confused about features, price and we also designed delivery process very perfectly to keep the faith of customer. The main agenda of my project is customer satisfaction maintenance and designed according to the customer mindset.

Major project:

Title : Email Spam Detection

Role : Team Member

Technology : Flask (Front-end), Python (Back-end)

Description: Email Spam detection is used to find the spam content in the mail. Machine learning plays a crucial part in predicting it, we perform some classification type algorithms and tell whether the mail is spam or ham mail. We performed many algorithms to get the best accuracy and this will ensure it performs well on any new data and gives us a good result.
