SIKANDRABAD, India 

15 July, 2002 

Looking for challenging work opportunities that allows me to continue learning developing as a computer scientist alongside a team of some of the best professionals in the field, which also help me to improve my skills and performance.

EDUCATION

B. Tech- Information Technology G.L Bajaj Institute of Technology and Management

Greater Noida

PERSONAL PROJECTS

Weather API

- It's completely possible to achieved an exciting, beautiful, interactive Weather API using Html, CSS and Javascript.
- Weather APIs are used in a wide range of applications such as online news outlets providing local weather reports, travel websites showing an overview of the current conditions of the weather.

Personal Portfolio Website

- It is a Portfolio based website project that is based on HTML and CSS.
- It's a personal website that provides information about me and an easy way to promote myself to the companies.

Clone Website

- By this project building, I created a replica of a existing website to make the changes.
- with this clone website, I customize the previous website and developed a new one.

Resume Builder

- The Resume Builder is a tool that generates a well- organized resume based on your qualifications, work experience and education.
- with this HTML, CSS, JAVASCRIPT project we can easily achieve a good resume. In this project, I design the frontend structure of a resume builder.
