PROJECT

(HELMET DETECTION AND INTIMATION SYSTEM)

This project is about detecting two-wheeler riders with and without helmet.

The proposed approach first captures the real time image of road and differentiates the two-wheeler from other vehicles in the road and the processes to check it whether the two wheeler rider wearing helmet or not.

The fine amount in the given period of time, and if the same vehicle Found next time without helmet, then the information is passed to the nearby Patrol officer Through an android application.
