WORK EXPERIENCE

GivFin, Bengaluru— Software Developer

May 2023 - Current

- Collaborate with cross-functional teams to deliver high-quality software solutions, including product managers, designers, and QA engineers.
- Stay updated with industry trends, emerging technologies, and best practices in loan aggregation and financial technology.

Byjus, Bengaluru— Software Developer

June 2021 - March 2023

- Proactively drive the scalability of a high-performance business application, delivering impactful solutions within the fintech industry.
- Engage with business stakeholders to gather requirements and successfully deliver comprehensive solutions.
- Demonstrated expertise in developing efficient RESTful APIs for enhanced performance.
- Proficient in implementing serverless webhooks and APIs, leveraging Lambda Functions.
- Collaborate with vendors to integrate their APIs seamlessly.
- Design and maintain robust database schema and models for PostgreSQL and MongoDB.
- Consistently meet deadlines and quality expectations, actively participating in peer code reviews.
- Extensive experience working with a microservices architecture to ensure optimal scalability.
- Successfully integrated OCR extraction tools from Hyperverge to streamline data processing.

Kondaas Automation, Coimbatore— Trainee

March 2020 - Feb 2021

- Working on an IOT app to monitor and analysis of the optimized energy consumption
- Automating and controlling the process with sensor data.

Education

PSG College of Technology, Coimbatore, *B.E* (March 2016 - April 2020)

SRV Boys Higher secondary school, Rasipuram (April 2014 - March 2016)

Certification

Security Awareness Training *Udemy*

M001-MongoDB Basics *Mongo University*

SKILLS

Javascript

Node Js

Express Js/ Koa Js

React Js

MongoDB

PostgreSQL/MySQL/Sequelize

Git / Bitbucket

Next js

HTML/CSS/Bootstrap Tailwind
CSS

Tools

Postman/ Swagger

MongoDB Compass

PG-Admin

Jira

AWS Lambda

AWS Cloudwatch

Microservices

AWARDS

Byjus — December 2021
Rookie of the Quarter

LANGUAGES

Tamil / English

Projects (Loan Aggregator Developer)

As a Loan Aggregator Developer, I specialize in designing and developing loan aggregator platforms, connecting lenders and borrowers to facilitate loan applications and comparisons. With a focus on seamless integration and user experience, I contribute to the success of loan aggregator systems by leveraging my expertise in API integration, data management, and platform development.

Key Skills and Responsibilities:

Platform Development: Designing and developing robust loan aggregator platforms, creating the architecture, database structure, and user interface to enable borrowers to access loan options and submit applications efficiently.

API Integration: Expertise in integrating with various lenders' systems and APIs, ensuring secure and real-time communication to fetch loan data and provide accurate information to borrowers.

Data Management: Proficient in managing and processing loan data securely, ensuring privacy and compliance while optimizing data retrieval and storage for seamless loan processing.

Loan Application Workflow: Implementing the workflow and logic for loan applications, including user registration, eligibility checks, document submission, and verification processes, ensuring efficient and accurate loan processing.

Integration of Third-Party Services: Incorporating additional services like credit score providers, document verification, and payment gateways into the loan aggregator platform, ensuring smooth data exchange and seamless functionality.

Maintenance and Upgrades: Providing ongoing maintenance and support for the loan aggregator platform, addressing user-reported issues, performing bug fixes, and implementing upgrades or new features as required.

By leveraging my technical skills and experience in loan aggregator development, I contribute to enhancing loan processing efficiency, user satisfaction, and overall platform success.

Vendors I have worked with **AVANSE, IIFL, ADITYA BIRLA FINANCE Ltd, KOTAK BANK, BAJAJ FINSERV**

My Milestone Project - Integrated end-to-end flow for Pre Approved Loan Vendor **Bajaj Finserv**.

- Tech Stack Used to build React, Node, SSR(Next.js), Lambda function(Serverless API), and PostgreSQL.
