- Agile, Object Oriented Analysis/Design

EDUCATION

M.Tech, Anurag college of Engineering, TS – 2015

WORK EXPERIENCE

Web Application Developer

Zensar Technologies, Hyderabad.

Feb 2021– Current

Web Application Developer

Imina Technologies Pvt. Ltd.

Jan 2015– Nov 2016

PROJECTS

Project / Client Name / Location – Commercial loan Orientation (CLO), FIS, Pune

Role: Front End Developer

Project Description: Commercial Loan Orientation is Loan processing application for the customers. It's having different modules one is Admin to add portfolio's role and permissions to customers. BUI module having different worklist for different stages of application to check the applications for the customers. They can complete the stages of application along with documentation in different screens.

Key activities performed:

As a team member I was actively involved in the below phases of projects I have worked upon:

- ❖ Designed and developed website using **Angular10/ Angular Material** including HTML, CSS, Bootstrap and Typescript.
- ❖ Designed and developed major new screens under CLO within Admin Module such as UserPortfolio's, Role and Permissions, Portfolio's.
- ❖ I involved in worklist screens to modification changes and added new features in BUI module.
- ❖ Created reusable components for creating custom controls like Tree View control, material list view.
- ❖ Created reusable Service to consume Rest API.
- ❖ Good Knowledge on source control tools like GIT.
- ❖ Coordinating with & Supporting team members in Defect Fixing, Testing, Deployment etc.
- ❖ Updating all assigned task status in Jira on daily basis and also in daily scrum meetings
- ❖ Understand each and every module.

Technology/Skills/Tools used

- ❖ Tools: Visual Studio Code & JIRA
- ❖ Technologies: Angular10, JavaScript, Typescript, CSS and Angular Material, Micro Services
- ❖ Skills: Implemented SPA

Project / Client Name / Location – CQI Supply Chain, CISCO, Pune

Duration: 4th Feb 2021 to Dec 2021

Role: Front End Developer

Project Description: CQI Supply chain is based on Angular JS/Java, mainly involves report generating to track all **CISCO** Hardware/ Software products and its information like product code, product family, GPID etc. Reports like RMA, EFR, CDRR, IR are developed under CQI field quality. Reports are generated and designed as per client requirement and data is displayed mainly in the form of High Charts and UI Grid format. FQC (Field Quality Council) is Angular 7/Java based project where all reports generated in CQI are shown in the form of PPT, furthermore user can download, edit, clone, share the PPTs.

Key activities performed:

As a team member I was actively involved in the below phases of projects I have worked upon:

- ❖ Designed and developed website using **AngularJS and Angular7** including HTML, CSS, Bootstrap and Typescript.

- ❖ Designed and developed major reports under CQI such as FFT Metrics (Level 3), Nevada Chart, Top 10 EFR, EFR Exclusion, CDRR & RR Details By BU, CDRR Exclusion and Justification, FA Indicator Detail, FA Analysis etc.
- ❖ Created reusable Filters like Updated By, FFT Category, FFT Case Status, FFT#, Return Month From and Return Month To etc..
- ❖ Created reusable Filters and Service to consume Rest API.
- ❖ Good Knowledge on source control tools like GIT.
- ❖ Coordinating with & Supporting team members in Defect Fixing, Testing, Deployment etc.
- ❖ Updating all assigned task status in Rally on daily basis and also in daily scrum meetings
- ❖ Understand each and every module.

Technology/Skills/Tools used

- ❖ Tools: Visual Studio Code & JIRA
- ❖ Technologies: AngularJS & Angular7/8, JavaScript, Typescript, CSS and Bootstrap
- ❖ Skills: Implemented SPA
