Work experience

Cendrol Technologies

Apr 2023 – Present

React Native Intern

1. We Are developing Application for Parent Company Cendrol Constructions
2. Working on 3 Apps At the Moment
3. Using Same code base and Ui to implement workflow in Android and IOS

Education

Full Stack Web development

Aug 2022 – Feb 2023

NxtWave

1. Proficient in developing web applications using the MERN (Express.js, React, Node.js) stack.
2. Extensive experience in building robust and RESTful APIs using Express.js, a flexible and minimalist web application framework.
3. Skilled in creating dynamic and responsive user interfaces using React, a powerful JavaScript library for building modern UIs.
4. Proficient in server-side programming using Node.js, allowing for efficient handling of server-side logic and real-time communication.
5. Experience in integrating various third-party APIs and services to enhance application functionality.
6. Solid understanding of the entire web development process, including database design, backend development, frontend implementation, and deployment.

Advanced CSS and Sass: Flexbox, Grid, Animations

Feb 2023 – Mar 2023

Udemy

1. Proficient in modern CSS techniques such as clip-path, background-clip, and transform to create visually stunning designs and effects.
2. Extensive experience in advanced CSS animations using @keyframes, animation, and transition for smooth and interactive user experiences.
3. In-depth understanding of CSS architecture, including component-based design, BEM methodology, and writing reusable and

maintainable code.

4. Strong knowledge of how CSS works behind the scenes, including the cascade, specificity, inheritance, and the visual formatting model.
5. Skilled in utilizing Sass to enhance CSS development, employing features like variables, nesting, mixins, and functions for efficient and scalable code.
6. Proficient in creating responsive designs with fluid grids, media queries, and responsive image techniques to ensure optimal display across different devices.
7. Familiarity with SVG images and videos in HTML and CSS, including generating SVG sprites, applying CSS-based color changes, and implementing background video effects.

Complete React Native in 2023 (with Hooks)

Mar 2023 — Apr 2023

Zero to Mastery

1. React and React Native are JavaScript libraries for building user interfaces, with React Native focused on mobile app development.
2. Debugging React Native involves troubleshooting and fixing issues in the development process to ensure smooth functionality.
3. React Navigation is a popular library for handling navigation and routing in React Native apps.
4. React Hooks allow developers to add state and lifecycle functionalities to functional components in React.
5. Custom React Hooks enable the creation of reusable logic and state management for React applications.
6. Firebase API provides a platform for building backend services, including authentication, real-time database, and storage, among others.
7. Google Maps API offers features for integrating interactive maps and location-based services into applications.

Interests

1. Mobile and Web Application Development: Passionate about creating innovative and user-friendly mobile and web applications.
2. Staying Current with Technology Trends: Actively researching and exploring the latest advancements in mobile and web development to remain adaptable in a dynamic industry.
3. Problem Solving: Enjoying the challenge of finding creative solutions and overcoming obstacles that arise during the development process.
4. User Experience (UX) Design: Interested in crafting intuitive and engaging user interfaces that enhance overall user experience.
5. Continuous Learning: Committed to ongoing learning and professional growth, actively seeking out new technologies, frameworks, and best practices to enhance skills and stay up-to-date.
6. Collaboration and Teamwork: Thriving in collaborative environments, effectively collaborating with cross-functional teams to deliver high-quality mobile and web applications.
7. Building Scalable and High-Performing Solutions: Striving to develop applications that prioritize performance, scalability, and efficiency.

Skills

1. React Native: Strong expertise in developing mobile applications using React Native, a popular framework for building cross-platform mobile apps.
2. React.js: Proficient in utilizing React.js, a JavaScript library, to build efficient and scalable user interfaces for web applications.
3. HTML: Strong command of HTML (Hypertext Markup Language), the standard markup language for creating web pages and structuring content.
4. CSS: Extensive experience in CSS (Cascading Style Sheets), including layout design, responsive styling, and creating visually appealing web interfaces.
5. JavaScript: Excellent knowledge of JavaScript, a versatile programming language used for client-side and server-side web development.
6. Basic Python: Familiarity with Python, a high-level programming language, which can be utilized for various tasks, including web development, scripting, and data analysis.
7. Redux: Skilled in using Redux, a predictable state management library for JavaScript applications, to manage application state and data flow efficiently.
