Front End	: ASP.Net
Designing	: HTML
CODE Behind	: C#

Description:

MRP project is a database driven project, which is used to computerize the orders processed by the company. Orders are booked over the net by the customers with the help of sales representatives. After receiving the orders from the customers the works manager will do the Material Requirement Planning and give the instruction to the stores in charge to find the availability of the materials in the stores. If not, the stores in charge will raise Indent & the same will be sent to the purchase manager.

Purchase department will take care of placing the orders with the supplier and the Receipt of the same. Once the goods are received the same will be delivered to the stores Department. The **GRN** (Goods Receipt Note) will be entered against the goods received from the supplier and the same updated in the stock master table. Once the goods are ready the same will be delivered to the person who has made the order.
