## **PROJECT DETAILS:**

### **PROJECT #1**

#### **Project: Role-Based Pricing for Storefront**

**Description:** It is an e-commerce web application that provides external sales of the university's content. This project focused on selling e-books, and educational documents processed by the DBP team via Case Management 4 system. The educational documents were onboarded on the storefront via the FTP server and made available to the users. Previously it was based on the static behavior of educational goods and their prices. In this project, this part of the e-commerce website has been enhanced by providing dynamic pricing to the users based on the user role. The pricing functionality is enhanced depending on user roles.

#### **Responsibilities:**

- Working in Automation testing (Selenium) + Manual testing
- Creation and Enhancement of Test Scripts
