📍 Mullakarathodi house cheraya (po) kongad, Palakkad, Kerala

I am an avid enthusiast with a strong focus on UI/UX design and website development. The field of designing, particularly in creating visually stunning and user-friendly digital experiences, captivates me. While I haven't had the opportunity to work professionally in these domains, my passion drives me to constantly innovate and deliver exceptional results.

With a meticulous eye for detail and a problem-solving mindset, I approach each project with unwavering commitment. Collaborative environments bring out the best in me, as I thrive on working effectively with teammates to achieve shared goals and overcome obstacles. Despite my limited professional experience, I have had the privilege of successfully developing a fully functional e-commerce website during a class project. This accomplishment not only showcased my technical expertise but also demonstrated my ability to create practical solutions that cater to real-world needs. By merging my creative design skills with an understanding of software development, I am equipped to leave a lasting impact by crafting visually captivating and user-friendly digital experiences.
