### **Project # 3**

Client : Wingherry Technologies Pvt. Ltd

Role : Angular Developer

Environment : Angular7, Typescript, , HTML, Bootstrap, CSS.

#### **Project Description:**

The purpose of this project is to allow patients to book a doctor's appointment at the available slots so that the patient does not have to wait in "Q" and also the patient can get a second opinion from the doctor. A second opinion is to ask for their opinion if you visit a doctor, medical specialist or healthcare professional. The medical advice can be compared.

A patient logs into the website or app to know the timing of taking a medication on time that is uploaded by the pharmacist by choosing schedules and checking the "taken" option, if the patient does not take the medicine at the right time would send an alert to the mobile phone.

Doctor logs into the website or app to know the details of the patient by choosing a patient Id or name based on their reports to give them advice or essential medicines.
