## Projects

### ○ **Ashvilla Construction Office Application:**

**Technology Used:** Python Django,MySQL

**Role:** Developer

#### **Description**

The Construction Management application offers a comprehensive solution for streamlining construction project management. By leveraging Django's robust features, the application provides a user-friendly interface for stakeholders to collaborate, track progress, and manage project documents. With its focus on improving efficiency, communication, and transparency, the Construction Management application is poised to make a significant impact on the construction industry, enhancing project outcomes and overall success.

### ○ **Human Resource Management Application:**

**Technology Used:** PHP,PhpMyAdmin

**Role:** Developer

#### **Description**

The HRMS (Human Resource Management System) Tool Application is a comprehensive web-based system developed using Django, a powerful Python web framework. This application is designed to streamline and automate various HR processes, enabling organizations to efficiently manage their human resources and improve overall workforce management.

### ○ **Matrimonial Website:**

**Technology Used:** PHP,PhpMyAdmin

**Role:** Developer

#### **Description**

A Matrimonial Website is an online platform that facilitates the process of finding a life partner or spouse. It provides a digital space for individuals to create profiles, search for compatible matches, and communicate with potential partners and their families. Matrimonial websites have become increasingly popular due to their convenience, wider reach, and ability to connect people with similar interests and backgrounds.
