❖ Career objective:-

professional It experience as software Developer in analysis, design, development, and management of web on windows based software applications to manage, test and develop distributed client/server, and Intranet applications on web and Android tool based Application.

Company name:

1.Connectm technology solutions pvt. Ltd

2: doodleblue innovations private limited.

Role: software engineer.

- Hand on experience connecting redux and react, and node.js adding more reducers to our store, adding an action and dispatcher in index web application knowledge of backend and frontend development base-product depends on client requirement.
- Hand on experience in products context setup, sidebar toggle, about checkout page, home page, home page services, contact, and redux setup alerts dashboard and profile management.
- Product name, price, description, filter, pagination single products loading, in express.js and react.js handle.
- Working single product base return and single product images the react.js frontend to backend to the database and deploy on GitHub with drag and drop.
- Hand on experience in react.js, hooks and redux, understanding tools used in visual studio and atom.
- Design, develop and test html, JavaScript, CSS, react.js, hooks and redux that meets accessibility and web browser standards for website.

skills: Operating System: windows, Linux

- Programming Languages: react.js, redux, hooks, es6, node.js, express.js, mongo dB, html, CSS, bootstrap, AWS , GitHub .
- Designing: 1:Keenhome.io (smart Bridge=> new York, UNITED STATES), (July. 2018 to December 2019)
- 2: Mypathshala (Ecommerce education website and App), (January. 2020 to march. 2021)
- 3: e-farming.in , website. (Selling for farming product), (april 2021 to December. 12.2022)

- 4: E-SIGN website (document signing ,sharing and publishing) (Aug 2022 to December .12.2022)
- 5: <https://www.vetport.com> (vetport is the pioneer in the cloud-based practice management software for veterinary clinic)

Project details:

Project;1

- **Myopathshala** is one of best online Learning platform to make preparation for competitive exams like SSC, Railway, Banking .
- Technology: -website
- 🚦 Role: mern developer
- Team size:12

Responsibility:

- Design in Setup and installs react-icons, folder page structure, react router setup, navbar – sidebar-side cart, footer, setup in navbar and component .
- Connect to mongo DB, router, page structure model, query param, name, pagination course, and number of filters, skip and limit in course used in node.js and express.js.
- Create a custom responsive web application to replace a legacy line- of business web application using React js, hooks, the return to redux build the model, filling model content.
- Design in user in login page backend model, validation, jwt token and front end by using React. js, hooks, redux and apply fo redux-trunk middleware.

ENVIRONMENT: React.js, hooks, redux, GitHub, node.js, express.js, mongo db. and AWS.

Project 2

- 🚦 Farms website ecommerce it is interactive Agri platform catering needs various channels such as E-commerce, Farms tv and faarmoji amongst others.
- 🚦 It's a one stop solution for farmers and provides a complete spectrum of products and services, including seeds, bio fertilizers, agro chemicals, animal feed, Agri equipment and implements and more delivered direct to the Farm place.
- ❖ Role: mern developer
- ❖ Technology: website

Team size:10

- Responsibility:
- Design in Seeds, animal feed, Agri equipment, bio fertilizers design router, model, name of product, skip and limit, pagination of product and filters of products.
- Setting up redux, navigation part, installing front, creating the video screen page.

- Involved in implementing the complete application in the in build architecture with react.js and redux.

➤ ENVIRONMENT: react.js, atom, react bootstrap, redux, hooks, Node.js, mongo DB. GitHub.

✚ Project:3

✚ Keenhome.io (smart Bridge) => US, NEW YORK

✚ Smart bridge connects control your keen zoning system with the keen home smart bridge.

The smart bridge connects your smart vents and temp sensor to the internet, to each other and to your smartphone.

✚ => At keen home, we aim to wake up the core but unloved area of the home by rebuilding them with intelligence and beauty. Your home should be a sanctuary, not another source of stress. by adding intelligence, automation and beauty to these core areas and you can shop keen zoning starter kit, Covent whole home system.

❖ Role: mern developer

❖ Technology =Website and mobile app.

Team size:11

- Responsibility:
- 1: design consumer and technician login page used in backend mongo db. and express.js.
- Design page Smart bridge es switch activation and cds check box installation used in backend model express.js and front end used in react.js and redux.
- Tech page side hangs in customer info page when call is received and showing heat strip for sprite air handler ac option.
- Design in Tech page product page throwing error of serial number and consumer page graphs x axis handling the validation error handling in express.js.
- Consumer app report tab should not show failed preseason test and crashing when tap click herebutton report responsibility.
- Tech screen hangs in name plate screen, tile refresh is not happening in dashboard design in react and redux.
- Tech page side improvement in few installation screen not able to read mobile signal, battery and time, and device is not connected pop up display in select Bluetooth device, page is user tap on back button is connection screen both consumer and tech app lot of task done responsibility.

➤ ENVIRONMENT: material-UI,atom, React.js, node.js, express.js, redux, hooks. mongo DB, react-native, android studio, XCode, GitHub, AWS.

✚ E- sign website

- ❖ This project is to develop e signing and sharing that website that helps people to sharing the document and get the signature privately. Implementation of secure eco-system from document sharing where only sender and receiver known the data they are sharing. Data will be encrypted and stored via the public and private key mechanism.
- Team size = 5
 - ✚ Project scope of work : website header, logo, navigation, document signing, document publishing, document sharing.
 - ✚ Document signing: user upload and send the document to other people to get signature on very secure connection. User will upload pdf document, edit the document, text input tags, initials and signature place and send.
- ✚ Role= mern developer
 - ENVIRONMENT: atom, React.js, node.js, express.js, redux, hooks. mongo DB, GitHub,

EDUCATION:

Completed b. tech Biju Patnaik university of technology, Adarsha college of Engineering & Technology,

Personal qualities:-

- Hard worker
- Positive thinker
- Good team player and positive attitude
- Strong motivational and leadership skills
- Ability to work as individual as well as in group.
