PROJECT SUMMARY:

PROJECT #1:

Project Name	-	IntelliJ & Selenium web driver with BDD Cucumber Framework.
Client	-	CorroHealth
Team Size	-	10
Role	-	Software Test Engineer
Duration	-	Nov 2021 - till date

DESCRIPTION:

TSystemEvolved: This is a CorroHealth application that stored All medical Required Information of Patient. Modules like Patient Demographics Details, Patient Contact Information, Patient Flags, Disposition And many more tabs which has some Functionality. This application has been purposely kept simple with the convenient and easy-to-use navigation thus allowing Patient to add comments, update comments & Remove Comments For multiuser. If we want multiusers also able to login & also perform the Action if Required, it will check by Performing automation. Before doing any automation, I need to understand the Manual workflow of the application. For that daily I have call with Client & discussed about the work status if I need clarification on manual flow then will be discussed with heron call, she helps me to understand the manual workflow then I will implement the thing as per requirements.

PROJECT #2:

Client	-	Humana Insurance
Testing type	-	Test Engineer
