Projects

3DX Valeo (TCS)

It's a Automobile based web application where I've contributed in building User Interface using React JS and as well as I've worked on backend technologies like Node JS, Express JS and RESTful Web Services for configuration and creating JSON Data.

Also I've led 4 junior developers in this project in order to complete the assigned task before deadlines and delivering on time.

Amazon Search (TCS)

In this E-Commerce application, I've worked on building the search component and other supporting components in the UI using React JS.

EZ Community (iTech India)

It's a community based application which provides multiple services. In this application I've worked on building the Frontend components using React JS. It consists of multiple form validations and the privileges will be provided based the user login.

Overtone Acoustics (TowerFour Solutions)

It's an E-commerce application where I've worked on building the UI components using React JS. It handles multiple acoustic products and has checkout page, login, cart page etc.

Work Experience

- 3+ years of experience as Software Developer. And it was a great experience working with the management, where i have led 4 members and built application using HTML, CSS, Bootstrap, Material UI, React JS, Express JS, Node JS and RESTful Web Services.
- Worked on 8 website projects and 3 web application projects with highly optimized code and maintaining the coding standards by implementing highly responsive user interface.
- Worked on Agile methodology by attending daily scrum calls and coordinated the team to complete the task on stipulated time.
- Designed dynamic and multi-browser compatible pages and also worked on cross-browser compatibility and tested each and every application on popular browsers like Chrome, Firefox, Edge etc.
- Developed and maintained web applications for the company's clients, including bug fixes, enhancements and in implementing new features.
- Worked on optimizing the applications to improve its performance in order to provide best experience for the end user by testing it in GT Metrix, PageSpeed Insights etc.
