Project #1:

Project Name : **SBI-TF (Trade Finance Solution)**
Team Size : 6
Duration : March 2021 – Tilldate
Role : Developer (MEAN Stack)
Project Description : **SBI-Trade finance** signifies financing for trade, and it concerns both domestic and international trade transactions. A trade transaction requires a seller of goods & services as well as a buyer. Various intermediaries such as banks & financial institutions can facilitate these transactions by financing the trade on Issuance of Letter of Credit (LC). LC will help the importer & exporter to enter a trade transaction & reduce the risk of Non-payment/ Non-receipt of goods.

Responsibilities:

- Designed and Developed SPA (Single Page Application) by using web technologies like HTML5, CSS, Bootstrap in Angular framework of version 9.
- Currently working on Upgradation angular version9 to version 14.
- Took an active role in structuring our single page applications to make them easy to maintain and to ensure they are highly modularized.
- Worked on Angular Forms to develop & apply validations throughout the application.
- Involved in collaborations with Business Analysts & Project Managers to understand business logics.
- Working as both front-end & back-end developer in the process of building the RESTful API.
- Involved in improving the Enhancements for application to upgrade new versions.
- Hands on experience in troubleshooting & fixing bugs which are escalated in minimal time.
- Working in sprints & attending daily scrum calls to achieve productivity as per the deadlines.

Project #2:

Project Name : **SBI-TF Client (Trade Finance Solution_Client App)**
Team Size : 4
Duration : March 2021 – Till date
Role : Developer (MEAN Stack)

Project Description : SBI-Trade finance Client App signifies financing for trade, and it concerns both domestic and international trade transactions in cloud platform (Digital Ocean). This is a User App for customers of SBI to create/ Issuance of Letter of Credit (LC) & also in order to Amend & Lodge their bill amount which are to be accepted & therefore to make payments through this application.

Responsibilities:

- Designed and Developed SPA (Single Page Application) by using web technologies like HTML5, CSS, Bootstrap in Angular framework of version 9.
- Currently working on Upgradation angular version 9 to version 14.
- Took an active role in structuring our single page applications to make them easy to maintain and to ensure they are highly modularized.
- Worked on Angular Forms to develop & apply validations throughout the application.
- Involved in collaborations with Business Analysts & Project Managers to understand business logics.
- Working as both front-end & back-end developer in the process of building the RESTful API.
- Involved in improving the Enhancements for application to upgrade new versions.
- Hands on experience in troubleshooting & fixing bugs which are escalated in minimal time.
- Working in sprints & attending daily scrum calls to achieve productivity as per the deadlines.

Project #3:

Project Name : IBOT HIVE (Product Web application)

Team Size : 6

Duration : september 2015 – 2nd march 2020

Role : fullstack developer .

Technologies : Angular6 ,ASP.NET4.5, javascript,jquery,WCF restfull.

Database : Mysql,Sqlserver 2013,sqlserver 2018.
