PROJECTS & MINI PROJECT

• **FOOD WASTE MANAGEMENT SYSTEM (WEB DEVELOPMENT)**

This project is used to manage wastage foods in a useful way. Every day the people are wasting lots of foods. So we have to reduce that food wastage problem through online.

• **SMART HOME APPLIANCE CONTROL SYSTEM FOR PHYSICALLY DISABLED PEOPLE (INTERNET OF THINGS)**

This is a hospital management user interface for managing, monitoring and controlling the system in a Hospital. This application is developed in java, which mainly focuses on basic operations in a hospital like adding new patient information, and updating new information, assigning the doctor for patient.

• **AIRLINE RESERVATION SYSTEM(APP DEVELOPMENT)**

Airline Reservation System” main aim is to provide the online ticket & seat reservation of National and International Flights and also give us the information about flight departures.
