Experience

Junior Software programmer

Soften Technologies

3April 2023 - 29september2023

- Responsible for creating modules with front end technologies, and also doing projects using python web framework (Django).
- Developed new projects associated with soften
- Generated back-end programming using software systems

PROJECT

Shopcom

Developed a fully functional e-commerce website called Shopcom using front-end technologies such as HTML, CSS, and Bootstrap for the user interface. Implemented back-end functionalities using Python with the Django framework, including modules for managing products, customers, and shopping carts. Utilized SQLite for the database management system

- Designed and implemented an intuitive user interface using HTML, CSS, and Bootstrap to enhance user experience.
- Developed back-end functionalities using Python and Django, including authentication, product management, and cart functionalities.
- Utilized SQLite to create and manage the database, ensuring efficient data storage and retrieval.
- Implemented features such as product search, customer registration, and order processing to provide a comprehensive e-commerce experience.
- Achieved seamless integration between front-end and back-end components, ensuring smooth operation of the website.
