Cell:9966660289

- ❖ Over 7+ syears of experience in UI/Web Development, designing User Interface (UI) applications and professional web applications using **HTML 4.0/5, DOM, CSS2/CSS3, jQuery, AJAX, JSON** with experience in the software development life cycle.
- ❖ Worked in **Agile Scrum Methodology** - attended daily standups, Sprint review, retrospective and planning meetings.
- ❖ Hands on experience in UI development process such as Analysis, Development and Testing, and associated methodologies.
- ❖ Strong experience with **jQuery, AJAX, and JSON.**
- ❖ Worked on Mobile-First Responsive Design using Bootstrap3, used Bootstrap templates for web applications. Good understanding of Grid Layout in CSS frameworks.
- ❖ Experience with **jQueryUI,** Bootstrap widgets to build accordions, auto complete, tabs and panels.
- ❖ Good experience with **Javascript to use DOM natively including cross-browser control**.
- ❖ Strong understanding of Javascript – **Closures, Scope, Promises, Modules, Prototypes**.
- ❖ Knowledge with **AngularJS MVVC** Model to create **directives, controllers, modules, routes and scope object**.
- ❖ Responsible for checking cross browser compatibility and hence worked on different browsers like Mozilla Firefox, Google chrome, and Internet Explorer. Used extensively **Firebug and Chrome Developer Tools**.
- ❖ Good knowledge of **Git** source control.
- ❖ Good knowledge of **Grunt** task runner.
- ❖ Good understanding of Cloud servers working Experience on **Google Cloud** Servers.
- ❖ Experience on working with cloud server Environment setup – **LAMP, WAMP, MEAN.**

- ❖ Excellent capability to explore, learn and understand newer business domains and technologies
- ❖ Proven ability in quick understanding and learning of new technologies and their application in business solutions
- ❖ Worked on NLP(Natural Language Processing) using GATE Tool.
- ❖ Having good knowledge on writing JAPE grammars for Text processing.

Current Employer

INNOVAPATH IT SOLUTION PRIVATE LIMITED **,** HI-TECH CITY, HYDERABAD,TS.

Education:

B.TECH in Information Technology from JNTU, Hyderabad, TS, India

UI Developer | TALENTSCREEN.IO - DUBLIN, CA   **17/11/2017 - Present**

Description: At TALENTSCREEN, a screening application for candidates and employers. The application is built using MEAN stack. We have used Auth signup and login using Google, Facebook, LinkedIn and GitHub. TALENTSCREEN has backend services in Node.js along with Socket.IO and ZMQ for distributed services. MongoDB and MySQL are the functional databases while Redis is used for caching. The UI of the application is built using SPA pattern with Angular.js.

Responsibilities:

❖ Complete exposure with **MEAN stack** (**MongoDB**, **Express web framework, AngularJS, NodeJS**) programming.
❖ Caching is implemented in Controllers using **Redis**. We used **Redis** Sets to store routes and data for GET operations.
❖ Created **SPA** using UI-router in **Angular.js**. Used state based routing.
❖ Used **Angular-UI directives**, **UI-Grid**, **Modal**, Tooltips and Progress to create UI using reusable code.
❖ Created custom directives – **avGrid** (combines **UI-Grid** and **Modal**), **avAddress**, **avContact**, **avCompany** to be used by multiple applications.
❖ Created UI for code/video and multiple choice quizzes using **MVVM** pattern using **$scope**, **UI-router** and **controllers**.
❖ Used **Github** for version control and **Pivital Tracker** for defect tracking.
❖ Extensively used **Javascript** patterns – Module, **Prototype** and **Constructor**.
❖ Used **HTML5** – **WebRTC**, video, semantic tags, progress, Storage and **IndexedDB API's**.
❖ Extensively used **Bootstrap3** for mobile-first responsive design and typography.
❖ Used **Git** as source control and planned for continuous integration and delivery.

Environment: JavaScript, HTML5, CSS3, Bootstrap, AngularJS, REST, Gulp, Git .

Developer   **15/09/2016 – 10/11/2017**
Resumeparser   Hyderabad, India,

Description: Parser that extracts information from any resume and converts into a structured .json format to be used by internal systems. The parser uses a **rule-based** approach that focuses on semantic rather than syntactic parsing. The parser can handle document types in .pdf, .txt, .doc and .docx (Microsoft word). In its current form.

Responsibilities:
❖ Java based parser API written in Play Framework
❖ Uploads resumes, uses NLP library to parse resume and saves it to Elastic Search.
❖ Writing Jape Grammars.
❖ Testing Jape Grammars in Gate tool to check accuracy.

❖ Written API in Java and play frame work.

❖ Responsible To write unit test Test cases in TestNG.

Environment: Java, Maven, Jape Grammars, Gate Tool, TestNG, GIT .

UI Developer   **17/04/2015 – 22/08/2016**
whiteboxqa   Hyderabad, India,

Whiteboxqa is a training portal here we are maintain the class schedules training videos and students preparation for software technologies here we implemented the quiz programming for screening and improve student skills of students who are attending to the trainings

Responsibilities:

❖ Developed internal and external validation code using JavaScript.

❖ Developed user interactive websites using web technologies like HTML, XHTML, CSS.

❖ Coded JavaScript for page functionality and Pop up Screens.

❖ Played an integral role in implementing and enforcing quality practices in the team organization to ensure internal controls, quality and compliance policies and standards.

❖ Implemented AJAX functionality using JQUERY, JSON and XML.

❖ Design and development of Web pages using HTML, CSS and XML including AJAX controls.

❖ Responsible for maintaining current websites that include updating web pages, upload new / etc content changes.

❖ Wrote extensive HTML, CSS and JavaScript code to build dynamic pages.

❖ Developed and designed the various screens and its architecture in accordance to UI Specs.

❖ Involved in the development of Dynamic loading of web pages using AJAX calls.

❖ New classes and functionality designed using several jQuery components for CRM implementation for customer service.

❖ Developed a core component of Analytics with Angular JS.

❖ Implemented Angular Controllers to maintain each view data.

❖ Implemented Angular Service calls using Angular Factory.

❖ Designed and developed custom jQuery components for the front end client side validations.

❖ Developed dynamic e-mails using JavaScript, and hand coding of HTML5 and CSS3.
