OBJECTIVE

To seek a challenging position in Software industry that needs innovation, creativity, dedication and enable me to continue to work in a challenging and fast paced environment.

SUMMARY

▪ Experience of **more than 8 years** in the web application development. ▪ Web Application proficiency in HTML 5, Java Script, jQuery, CSS,JSON, Ajax ,WordPress ,CodeIgniter, Basics of Shopify, Laravel.

▪ Responsibilities include requirement gathering, analysis, estimation and user interface development.

▪ Develop,Deploy,Troubleshoot and maintaining Websites.

▪ Experience in Both Backend and Frontend development.

▪ Experience in Code Versioning tools like **GitHub**.

▪ Experience in **figma** prototype tools.

▪ Experience with Debugging tools ,Chrome inspector, Firebug etc

▪ Experience with Third party's API like Google Analytics, Mail Server, Social Media like Facebook,twitter etc **.**

▪ Experience in Wocommerence, Custom themes,Plugin.

▪ Experience in Payment Gateway like Stripe, Paypal etc.

PROFESSIONAL EXPERIENCE

▪ working as a web Developer for product development in **Stallioni Net Solutions**, Annur.

EDUCATION

- B.Tech from Adithya Institute of Technology, Anna University, Coimbatore. Graduated 2016 - 70%

- HSC from S.R.C.M.M.Hr.Sec. School, Annur (2012) - 70 %

- SSLC from S.R.C.M.M.Hr.Sec. School, Annur (2010) - 74 %

TECHNICAL SKILLS

Languages : **HTML5, CSS3, JavaScript, Ajax** , **Json, Woocommerence**

Libraries / Frameworks : **jQuery, Bootstrap**

Source Code Control : **MVC, PHP, CodeIgniter,Wordpress ,Laravel, Basics of shopify**

PROJECTS:

1. https://www.latentview.com/

Application : Website (WordPress)

Role : Developer (Team Member)

Software / Technology used :
HTML5, CSS3, Ajax, jQuery, Bootstrap, WordPress, Accordion ,Javascript .

Project description

The objective of this project is to build a unique platform for app advertising which allows the advertiser to convey their brand message to the intended audience in a much less disruptive manner.

The key areas I dealt with are,

1. Examining the requirement and develop a user friendly application interface for the user like advertiser, publisher and administrator.

2. It involves placing the right flow pattern to the advertiser, publisher and administrator section which involves the different functionality for controlling the application

3. User interface Testing, Performance Testing and Deployment.

Roles & Responsibilities:

1. As a team member it involved analyzing the requirement document, planning and time estimation for deploying the product.

2. Responsible for creating the user interface mock-up screens.

3. Modules segregation with suitable functional flow and assigning it to the team members.

4. Monitoring the project development in accordance with the requirement document and ensures the release date of project is met.

2. https://zonatuya.com/

Application : Website (WordPress)

Role : Developer

Software / Technology used :
HTML5, CSS3, Ajax, jQuery, Bootstrap, WordPress, Multivendor,javascript, woocommerence, API .

7. https://hippy.in/

Application: Website (WordPress)

Role : Developer

Software / Technology used: HTML5, CSS3, Ajax, jQuery, Bootstrap, WordPress, javascript, woocommerence,

Project description

The objective of this project is to build an ad server platform used to deliver the ads on websites and handset devices effectively based on various targeting functionality so there is an increased attraction on advertiser products with interactive user interface and components.

The key areas I dealt with are,

1. Analyze the requirement and build a user friendly interface for application user like advertiser, publisher, network administrator, determine flow patterns and put the features in best place.

2. Developing and Integrating interactive user interfaces foreach module in responsive manner

3. Building independent reporting components with interactive user interface

4. User interface Testing, Performance Testing and Deployment.

Roles & Responsibilities

1. Analyze the requirement document and Planning

2. Module segregation with suitable functional flow

3. Architecture design and Technical Environment Settings

4. Conduct Knowledge Transfer sessions to the new entrants in the team.
5. Responsible for proposing a skeletal user interface mockups and providing best user interface.

8. https://nuescent.com/

Application : Shopify

Role : Developer

Software / Technology used : HTML, PHP, CSS3, JavaScript, jQuery, Ajax and Bootstrap.

Project description

The objective of this project is to build generic platform for advertising which delivers the Image and Video ads on websites and handset devices with various targeting functionality.

The key areas I dealt with are,

1. Analyze the requirement and build a user-friendly interface for application user like advertiser, publisher, network administrator, determine flow patterns and put the features in best place.

2. User interface Testing, Performance Testing and Deployment.

Roles & Responsibilities

1. Analyze the requirement document and Planning

2. Module segregation with suitable functional flow

3. Users visit the site and register to become members.

4. Will pay for the subscription package online using his credit card/ PayPal.

5. Each package will have a set number of jobs that the users can store on the site based on the amount of the package.

6. Users can keep track of inspections and make sure they are done on time.

7. The system will display information on jobs that need inspections and when they need to be done prominently in the dashboard.

9. www.lostpethq.com

Application : WordPress

Role : Developer

Software / Technology used : Wordpress, HTML, PHP, CSS3, JavaScript, jQuery, Ajax, Bootstrap.

Project description

The objective of this project is to build generic platform for advertising which delivers the Image and Video ads on websites and handset devices with various targeting functionality.

The key areas I dealt with are,

1. Analyze the requirement and build a user-friendly interface for

   application user like advertiser, publisher, network administrator,

   determine flow patterns and put the features in best place.

2. User interface Testing, Performance Testing and Deployment.

Roles & Responsibilities

1. Users visit the site and can report Lost Pet or found pet details 2. Create a Free Listing on the site

3. Select a package (Free or paid package) and submit listing.

4. Search module:

a.   Users can search for pets listing based on their location

b.   Search criteria include: Pet Type, Missing Zip code, Radius, Pet name /Pet id, Breed, Color, Missing status etc.,

c.   Matched pets listing will be displayed.

d.   User can reply to the pet listings.

10. http://scaffcert.com/

Application : CodeIgniter

Role : Developer

Software / Technology used : Software / Technology used : CodeIgniter, HTML, PHP, CSS3,Javascript, Ajax,Bootsstrap,jQuery.
