Hard Skill

- ReactJs
- Redux
- Semantic ui
- Javascript
- Html
- CSS/ SASS/ LESS
- Python
- C Programming

Soft Skill

- Collaboration
- Design Understanding
- Time Estimation
- Troubleshooting

Education Background

- BE - Electrronics and Communication Engg
  Chendhuran college of Engineering
  Completed in 2022 with 80%

- HSC
  Sri Venkateshwara Matriculation Higher Secondary School
  Completed in 2018 with 84%

- SSLC
  Sri Venkateshwara Matriculation Higher Secondary School
  Completed in 2016 with 97%

About Me

A results-driven Front-End Developer with 1 year and 5 months of experience, specializing in UI design, web development and project management. A proven track record of collaborating cross-functionally with technical teams and stakeholders across all phases of the software development lifecycle.

Professional Experience

Software Engineer | Amphisoft Technologies Private Limited

26/11/2022 – 24/01/2024

Key responsibilities:
- Design and implement user interfaces using React.js.
- Collaborate with designers to transform visual designs into interactive web applications.
- Develop reusable and modular components using React.js.
- Implement component-based architecture to enhance code maintainability and scalability.
- Manage application state using React.js features like useState and useContext.
- Implement state management libraries like Redux for more complex state requirements.
- Identify and debug issues in React applications.
- Use browser developer tools and other debugging techniques to troubleshoot problems.

Software Engineer Intern | Amphisoft Technologies Private Limited

26/08/2022 – 26/11/2022

Key responsibilities:
- Gain proficiency in React.js and related technologies through hands-on experience and training.
- Learn about modern web development practices and tools.
- Collaborate with senior developers or team members to implement user interfaces.
- Work on assigned tasks related to UI development using React.js.
- Contribute to the development of reusable and modular React components.
- Gain experience in building component-based architecture.
- Actively participate in team projects and tasks.
- Take on small coding assignments and gradually increase responsibilities.

Work Experience

Project – 1 : Hrlytics Application

Technology : ReactJs, HTML, SASS

Employer : AMPHISOFT TECHNOLOGIES PVT LMT

Roles and Responsibilities

- Designing the page to view the doubts raised by the participants. Also, designing the page to schedule, update, and delete meetings on the course manager side.
- Creating the excel reports of the participants where the details are fetched from backend calls and integrated with the frontend.
- Implementing the validating functionalities in the form while scheduling and creating a meeting.
- Designed and implemented robust messaging functionality within an application, facilitating seamless communication between multiple participants and the course manager.
- Developed a user-friendly interface for participants to raise doubts and enabled the course manager to efficiently address and reply to inquiries. Enhanced overall communication flow, fostering a collaborative learning environment.
- Style the components based on the design provided by the UI/UX designer. Ensure responsiveness for different screen sizes and devices.

Project – 2 : E-box Application

Technology : ReactJs, HTML, SASS

Employer : AMPHISOFT TECHNOLOGIES PVT LMT

Roles and Responsibilities

- Bug Fixing: Successfully identified and resolved software bugs, ensuring the stability and reliability of the eBox application.
- Feature Enhancement: Played a crucial role in feature development, including the addition of new fields to forms, improving user interactions, and enhancing overall application functionality.
- Design Updates: Implemented design updates to enhance the user interface and improve the overall user experience of the eBox application.
- Collaborative Problem Solving: Worked closely with team members to analyze issues, brainstorm solutions, and implement effective resolutions.

Project – 3 : E-box digital website

Technology : ReactJs, CSS, HTML

Employer : AMPHISOFT TECHNOLOGIES PVT LMT

Roles and Responsibilities

- Design the user interface for the Ebox digital website.
- Consider responsive design principles for various devices. Work closely with developers to implement design elements.
- Implement the responsive design using HTML, CSS, and JavaScript. Ensure cross-browser compatibility and responsiveness.

Project – 4 : Hrlytics Website

Technology : ReactJs, HTML, SASS

Employer : AMPHISOFT TECHNOLOGIES PVT LMT

Roles and Responsibilities

- Implement the frontend of the HRlytics website based on the design.
- Ensure the website is responsive and compatible with various devices.
- Integrate interactive elements and animations.
- Apply new knowledge to improve the HRlytics website's frontend architecture and performance

Project – 5 : Created problems in E-box website

Technology : Jest, ReactJs, CSS, HTML

Employer : AMPHISOFT TECHNOLOGIES PVT LMT

Roles and Responsibilities

- Successfully conceptualized, designed, and implemented more than 30 problems centered around React.js concepts within the E-Box application.
- Test Case Development: Designed and executed thorough test cases to ensure the functionality, accuracy, and reliability of React-based problems.
- Packaging and Integration: Proficiently packaged and integrated the created problems into the eBox application, providing a seamless and interactive learning experience for users.
