PROJECT

MINI PROJECT(Group):

Daily Expense Tracker
(03-2019 to 04-2019)
Organization: KGCAS
Team: 6 Members
-Which tracks the details of daily expenses about the customers though web applications
-Each user required to register on the website and they will be provided with the key ID which is used to maintain the record
-The user can attach the image of the bill to remember when and where the payment was made, through cash or card
-The database will be updated and it provides the balance in user's pocket.
-It will also provide the graphical status comparing the past records
-E-mail will be sent to the user at the end of each month about the monthly expenditure. The user can also download it in Excel format.
-Software and Hardware Requirements: SQL Server Management, Internet Explorer 5.0 and above or Google Chrome , Minimum 1GB RAM.

FINAL YEAR PROJECT:

Build an Instagram using chatbot
(01-2020 to 03-2020)
Organization: KGISL
-Instagram is a more friendly website after Facebook.
-Many of them are using it for online purchasing.
-So i added a chatbot for direct messages, for the instant reply of an ordering item.
-By this we can't lose the customers.
-Software and Hardware Requirements: PHP and MySql, Minimum 1GB RAM.
