- Providing support while creating stored procedure for the reports
- Unit testing Module level

Project #3
 Project   **: Smart Work Force Management**

Period   : January 2019 – March 2021

Project Type : Increase efficiency and productivity by simple management of employee at work remotelyin real time.

Increase efficiency and productivity by simply managing employee presence in the workplace with your remote smartphone and server on the ground in real time. The dashboard shows the status of employees and work, so at a glance,management is aware of how the company's employees are being used.

- Staff Maintenance Labor Cost Avoidance
- Maintenance Overtime Cost Avoidance
- Informal Support Savings (indirect).
- Reduce Setup and Reconfiguration Costs.

Attendance

- Increase efficiency and productivity, monitor your employees at work place or remotely in the field real time.
- Track your employees Login and Logout at work place or remotely in the field in real time.
- Validate the employee's location, face image during their attendance.
- Leave request and permission request for employees.
- Real time access and automated reports.
- Enhanced Workforce Effectiveness through collaboration, communication and information sharing.
- This application is Working on Android,Windows,IOS and Online Website.

My part of the work is UI design and background work with PHP on Smart Work ForceManagement.
And create a database for the required data field using mysql admin.
