## Projects & Experience Summary

**Project: PG Management System**

**Project Domain:**

- **Project Type**: Web Application
- **Role**: Full Stack Developer
- **Duration:** Jan 2023 to Oct 2023

**Project Description:**

- **Internet Details Module**: Spearheaded the development and implementation of an internet recharge and expiry tracking system, enhancing operational efficiency by streamlining the management of internet services.

- **Employee Rating Module:** Conceptualized and executed an employee rating module, enabling comprehensive performance evaluations and fostering robust feedback mechanisms for continuous improvement.

- **Attendance Module:** Engineered a sophisticated attendance module, ensuring precise recording and monitoring of employee attendance while seamlessly integrating with existing HR systems for enhanced efficiency.

- **Grocery and Vegetable Stock Management System:** Designed and implemented a comprehensive inventory management system for tracking grocery and vegetable stock, including purchase details and quantity management, optimizing resource utilization.

- **Employee Onboarding:** Established an efficient employee onboarding process, facilitating smooth integration of new hires into the organization by streamlining entry procedures and documentation management.

- **Salary Advance Module**: Developed a salary advance module to streamline and track employee salary advances, enhancing financial management processes and ensuring timely disbursement of funds to employees in need.

- **Petty Cash Transactions:** Implemented a system for recording and managing petty cash transactions, enabling accurate tracking of expenses and ensuring transparency in financial operations.

**Technology Used:**

- Frontend: Java Script, Vue.js
- Backend: PHP, Laravel
- Database: MySQL

**Project: PG Management Mobile App**

**Project Domain:**

- **Project Type**: Mobile Application (Android & IOS)
- **Role:** Full Stack Developer
- **Duration:** Sep 2023 to Feb 2024

**Project description:**

- Developed a mobile application catering to PG guests, providing a user-friendly platform for searching booking, and reviewing accommodations.
- Implemented features such as user authentication, search filters, real-time notifications, and secure payment integration.

### Key Features Developed:

- **Complaint Management:** Implemented a feature allowing guests to raise and track complaints for swift resolution.
- **Vacate Intimation:** Developed a module enabling guests to submit vacate intimations seamlessly.
- **Announcement Reception:** Designed functionality for guest to receive announcement from the management.
- **Terms and Conditions:** Incorporated a section for guests to review and accept terms and conditions.
- **KYC Form Submission:** Developed a module allowing guests to submit KYC forms electronically.
- **Push Notification:** Implemented Push notification for android and IOS app based on Firebase cloud messaging system.
- **Payment Gateway Integration:** Integrated UPI and Razor pay for secure and convenient monthly and advance payments.

### Technology Used:

- Frontend: Angular
- Backend: PHP
- Payment Integration: UPI, Razor pay
- Database: MySQL
