SKILL HIGHLIGHTS

- NodeJS Python TypeScript
- Express JS Angular 2
- Microservices
- Mongo DB Arango DB
- AWS Azur DevOps
- GIT
- Dockers
- VS Code
- Postman

LANGUAGES

- English
- Hindi
- Marathi

Area of Interest

- Machine Learning
- Artificial Intelligence
- Cloud Platforms

EXPERIENCE

- Build REST APIs in NodeJS with MongoDB as database.
- Worked on Express JS framework where create Routes, Controllers, Models, Middleware's
- Build module with JWT for user authentication where the user of the application queries the backend via Blockchain Network
- Build module to send Email Notification to user once asset is available
- Used MVC architecture for Building server-side application
- Build Server side in NodeJS with Arango DB as a Database
- Worked on Accenture product build for Insurance company to check the risk of the product
- Build module for barcode generation containing user and asset information in encrypted format
- Push and pull code to Azure DevOps
- Presently working Microservices

EDUCATION

Bachelor of Engineering : Computer Science and Engineering
Diploma : Computer Management

PROJECTS

Property Registration Management System (C-DAC)

User Access Management Portal (Accenture)

RSA (Accenture)
