PROJECTS

TITLE : MEDICAL PRESCRIPTION HANDWRITING RECOGNITION SYSTEM

Domain : Deep Learning

Reading a doctor's handwritten prescription is a challenge that most patients and some pharmacists face; an issue that, in some cases, lead to negative consequences due to wrong deciphering of the prescription. Part of the reason why doctor's prescriptions are so difficult to decipher is that doctors make use of Latin abbreviations and medical terminology that most people don't understand.

TITLE : CREATING A VPC

Domain : Cloud Essentials

A Virtual Private Cloud (VPC) is a private network in the cloud. You can manage your VPC based on your business requirements. For example, you can specify CIDR blocks, and configure route tables and gateways for your VPC. You can also add secondary CIDR blocks to a VPC.
