BENZER E S

FULLSTACK DEVELOPER ,FRESHER

OBJECTIVE

Enthusiastic and motivated Fullstack Developer with a strong foundation in modern web development technologies and practices. Eager to contribute to dynamic projects that require both frontend and backend expertise. Possesses a deep passion for learning and staying up-to-date with industry trends.

PROJECT

STONE, PAPER, SCISSORS GAME USING PYTHON

For working in this project we have to receive choice form the user and compare it with computers choice. The results will be based on score.

FOOD RESTAURANT WEBSITE USING REACT AND MUI

The "Food Restaurant website" is an enticing and user-friendly web application meticulously crafted using react and material-ui. It serves as a digital gateway to a delectable dining experience at our restaurant. This project seamlessly blends aesthetic design with robust functionality, making it an ideal platform for both restaurant enthusiasts and hungry patrons and it's a responsive website.

RANDOM PASSWORD MAKER USING PYTHON

Enhance the Password Generator project to incorporate user-defined password length input, enabling users to specify the desired length for the generated passwords, thereby increasing customization and security.

CERTIFICATION

Certified FULLSTACK Developer Trainee at Besant Technologies,Chennai.
