React Js Developer

PROJECTS

Yaass, 183 Days

Yaass it's like a combination of some social media application

HizTrip, 90 Days

Riya (PLAYSTORE LINK: https://play.google.com/store/apps/details?id=com.elab.trackanything&hl=en) Riya is an Application which is used for Flights Booking (B2B) Application for INDIAN agency. Platform: Android, Rest, Json, .Net, SQLite Responsibilities: ? Agents have to register terminal ID with

mobile number, so they will get password to complete the registration as well as for login credential. This registration process is one time process ? Once the agent registered their Terminal ID ,whenever the open the application it Redirect to Login Page ? Agent may book onward as well as return trip in this application , with multiple passengers (Adult , Child ,Infant) selection . ? Now the agent can shows all available flights with fare and flight code etc? ? After that flight fair details will show the charges depends on the passenger type (Adult , Child ,Infant) selection. ? In Booking Page there are two process for booking 1) By Top up . 2) Payment Gate Way .
