PERSONAL PROFILE

Date of Birth	27-07-1997
Marital Status	Single

PROJECT DETAILS

Project 1:

Project Title	Subx
Environment	**Node JS, Express JS, React JS, PostgreSQL**
Role	Full stack developer
Description	This is a Gaming and Shopping platform. It also helps brands and creators to connect with their fans through Live Streaming experiences - shopping, games, auctions, giveaway and more. It helps brands to engage their fans in real-time, monetize them using our instant show templates and convert them to customers.
Roles & Responsibilities	In this project they have existing single source streaming using AWS. I have changed that to multiple and also developed a giveaway module. Then I developed a scheduler streaming process.

Project 2:

Project Title	**Matrimonial Website**
Environment	**React JS, Node JS, Express JS, MongoDB**
Role	Full stack developer
Description	This is a Matrimonial website, where brides and grooms can find their future partner.
Roles & Responsibilities	I've developed all the modules in this project on my own and also I used ccavenue as a payment gateway. Other than that I used AWS S3 to store images.

Project 3:

Project Title	**Insta - Tracker**
Environment	**PHP, MYSQL, HTML, CSS, JQuery**
Role	Backend Developer
Description	This is a multi-tenant employee tracking tool which keeps track of employee status on a daily basis. The application is user friendly, flexible and dynamic.
Roles & Responsibilities	I've developed all the modules in this project. In this project I integrated maps to view all the employees current location.

Declaration:

I hereby declare that the information given above is true to my knowledge and belief.

Date: **Yours faithfully**
