ACADEMIC PROJECTS

Pet Shop Management System Using ASP.NET:

In most animal clinic facilities, daily clinic bookings and transactions are still done on offline.

Data Analysis Of Smart Farming Using IOT:

In this paper, we propose developing a system optimally watering agricultural crops based on a wireless sensor network.

Fake News Detection Using Python And Machine Learning:

Detecting false news of social media is an emerging area in the present scenario. News from social media has great impact on society now a days.
