Skills

Technical Skills

- Dart   ★★★★☆
- Flutter   ★★★★☆
- Javascript   ★★★☆☆
- ReactJS   ★★★☆☆

Secondary Skills

- NextJS   ★★☆☆☆
- PostgreSQL   ★★★☆☆
- Angular   ★★☆☆☆
- Unity   ★★☆☆☆
- NodeJS   ★★★☆☆

Tools

- Git
- Android Studio
- Visual Studio Code
- XCode

Strengths

- Quick learner
- Problem Solving
- Adaptability

Exposure to

- In-App Purchase
- Email Editor with WYSIWYG
- Payment integration using Razorpay
- Single sign-on
- Deployment of app to App Store & Playstore

Projects:

1. **HOUSEFACTS - Web**

   - Web application for property views for real estate purpose

   - User can search for a property and view its details with images and download the documents related to the property

   My role : Front-end, API Integration

   Technology Used : React JS

2. **CATTLE MANAGEMENT - Web**

   - Web application for management of cattle through its lifecycle

   - A calf can be added, viewed, update, moved from one stage to another, sold; Vaccination details can be added and updated

   - This application helps to track a calf from its birth

   My role : Front-end, API Integration

   Technology Used : React JS

3. **INCIDENT MANAGEMENT - Web**

   - Web application for incident management which has two user roles

   - Logger can log a new incident and wait for it to be resolved by the resolver and acknowledge the same once done

   - Similarly, the resolver can pick up an incident to resolve and communicate with the logger for queries via comments and get it resolved

   My role : Front-end, API Integration

   Technology Used : React JS

4. **HAUSLEADS - App**

   - App for managing the clients of a real estate company

   - Helps view property details, all leads and their details, contact them via email, add reminders/appointments etc

   My role : Front-end, API Integration

   Technology Used : Flutter

5. **SIKI - App**

   - Music app based on crypto/NFT technology that brings together the song artists and curators

   My role : In-App Purchase Integration, Front-end, API Integration

   Technology Used : Flutter

6. **SIKI - Web**

   - Web version of Siki App

   My role : Front-end, API Integration

   Technology Used : ReactJS

7. **SKILLANGELS - App**

   - App that helps students to enhance their cognitive abilities via puzzles

   - B2C app where the user can register themselves and get aligned to the course

   - Includes reports, leaderboards, badges earnings, themes, BGM, timer etc.

   My role : Front-end, API Integration

   Technology Used : Flutter

8. **NGO APP**

   - An app to connect donors and volunteers for planting

   - Donors are those willing to donate for a plant and volunteers are the ones willing to plant saplings

   My role : Front-end, API Development, API Integration

   Technology Used : Flutter, NodeJS, PostgreSQL

9. **Food Order - App**

   - App UI for online ordering of food - https://github.com/jayapradha0105/food_order.git

   Technology Used : Flutter
