ANFEER A

Backend Developer Trainee

As a backend developer trainee I undergo training or an internship to become proficient in backend development. I learn programming languages such as Python, Java, C, or Node.js and work with web frameworks like Django, Spring, Ruby on Rails, or Express.js. I had gain knowledge of databases (SQL or NoSQL) and data management, including storing, retrieving, and manipulating data. I also learn about creating and integrating APIs using technologies like RESTful or GraphQL.
